[Abandoned Vessel Costs.xlsx](#)

Ruth,

Sorry I didn't get this out yesterday! I got pulled on to other projects.

Here is the data I was looking at – trying to get estimates of abandoned vessel removal costs. It is almost all from the Washington data the Melissa provided to me, but I also used information from seven fishing vessels that the Oregon program removed. Just FYI – I didn't include the vessels in red on the Washington sheet – I wasn't sure of those costs.

Rachel,
I think you did a little statistical analysis and cleanup of the vessel removal cost data I sent you? Would you be willing to send that to Ruth?
Thanks

Hi Melissa,

Know you have been swamped lately (ouch!), but we are still interested in some of your (at least ballpark) vessel removal costs (for various sizes and circumstances).

Thanks!
Ruth

share with me? Ballpark figures would be fine. Also, just a few examples would suffice if that is any easier for you.

>

> I am currently detailed to NOAA's Marine Debris Program working on the Japan tsunami marine debris issue. We are doing a cost estimate fire drill for various contingency planning scenarios for different types of potential debris (include vessels adrift and aground) in different potentially affected areas. Appreciate any numbers you have that might help.
